HORIZON INTERNATIONAL

Horizon International Limited has been a family owned and operated business for more than 40 years.

The company's strength is drawn from its tenure in the New Zealand paving industry, where Horizon International has supplied over 1,000,000 square metres of paving products throughout the country. The company has also supplied and installed numerous contracts throughout Australia, the Pacific and Asia.

With exclusive reseller distribution rights to large international brands to marketing and distribution of its company owned range of products, Horizon International Limited has the largest range of pavers in New Zealand and remains parochial about all things paving. In addition to the pavers Horizon also have exclusive rights to ancillary products including a full mortar system, sealers and all associated products that will provide a solution for specifiers.

We stand behind our ability to deliver a quality brand and product that is relevant today.

With over 40 years experience, Horizon can provide assistance and a solution to every paving requirement.

We have technical expertise as well as practical experience.

NUBRIK CLAY PAVING

Nubrik are a top quality range of clay pavers. The Nubrik range has been used extensively throughout New Zealand with over 500,000m² installed.

These include prestigious projects such as Auckland Sky City, Auckland Viaduct Basin as well as prominent South Island locations such as the Blenheim and Timaru CBDs through to the streets of Arrowtown and Queenstown.

The pavers offer the highest technical properties backed with 15 year product guarantees*.

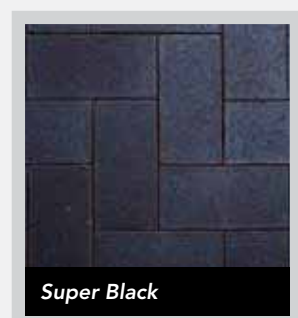

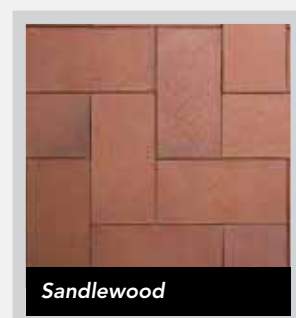

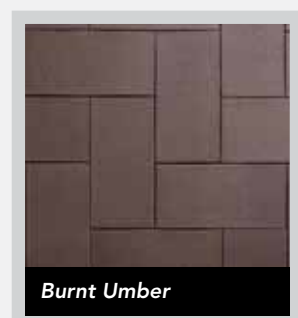

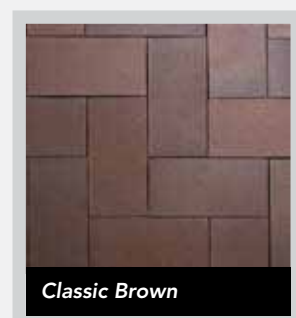

Pavers are available in 50mm and 65mm thickness.

With over 40 years in the industry the staff of Horizon can assist with any technical assistance.

* Based on installation in line with Manual One by NZ/AUS Clay Brick and Paver Institute.

POOL PAVING TERRAZZO

QUALITY PAVING COPING OPTIONS

Unrivalled pavers revitalising the value within

The true value of any project is where the “value adds” are found. Value added activities or contributions most often produce measurable results for your project such as money saved, awed customers, or significantly reduced time or steps necessary to complete a work process.

Clients who have selected Horizon International’s Terrazzo Veneto paving range for their outdoor projects have an identifiable, noteworthy value add impact to their most prized possession, their home.

Terrazzo Veneto honed paving is perfect for all applications: patios, paths and around swimming pools. Veneto pavers are unique in their method of manufacture, finished with a non-skid surface, safe for all interior and exterior applications.

Solely produced on an Italian made 7 head carousel press and afforded the same unique manufacturing process as its parent brand Terrazzo Veneto, each Pastelli Veneto paver is hydraulically pressed at 200 tonne per square inch. Within a scalable operation, 250 m² of Veneto paving is produced in one shift, each day.

What’s the benefit of a carousel press? The pressure and process applied removes excess air and moisture from the paver resulting in a hard, dense, colourfast and dimensionally correct product. Partnered with Peter Fell, New Zealand’s market leader in colour oxides, the Veneto range is principled with quality materials, yet carefully priced for your target customer to do business with you.

POOL COPING OPTION:

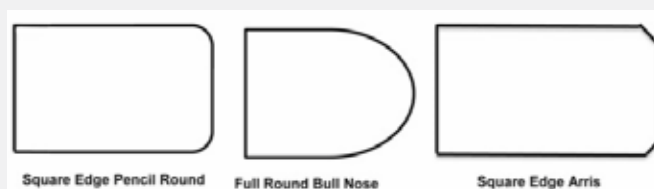

Collectively, for both paving ranges, they are accompanied by matching pool copings in 3 edge finishes:-

- The traditional full round bullnose
- The modern, Square edge aris
- Square Edge Pencil round detailing

ADVANTAGES OF HORIZON COPINGS

- We guarantee pavers will retain colour
- We can pre-seal pavers at the factory if required
- You can acid wash Horizon pavers, we strongly recommend Guard it Green Acid
- You can water blast Horizon pavers
